Specification (M3+):

Parameters:

- 100% galvanised and powder-coated steel
- covering: 6 mm cellular polycarbonate with UV filter
- 4 foundation points
- full statics for all locations
- deliver of the shelter as a complete structure reduces the assembly time
- can be erected on feet (for levelling purposes)

Multiplications:

As a single structure the M shelter cannot be multiplied. However, successive single shelters can be installed behind one another at the same time.

Each our structure is adapted to the weather conditions prevailing in the specific area basing on wind and snow maps.

The production process is carried out on the basis of the standards:

PN EN 1090 -1-2
ISO 3834

Every product has a certification mark:
